

## USER INTERACTION

### Websites

1. Jules Bassoleil - <http://www.julesbassoleil.fr/>
  - When the user hovers over the navigation bar, the words turn darker and the social media icons shift from light gray to colorful by sliding up. And when the user hovers over a project, it darkens up
  - When clicking on a project, the cursor expands to three different sizes, then a page slides from the left and then the project page opens
  - On the project page, when the user scrolls down, the image goes to the side, and a text appear
  - At the end of the project page, depending where the mouse is positioned, the cursor symbol changes and the page is closed or it goes to the next project or to the previous project
2. Fixed Group - <http://www.fixedgroup.com/>
  - Depending where the cursor slides to, the image follows it, moving slightly to the side of the cursor
  - When scrolling down, the next image, which is divided horizontally, moves up, forming the whole image and the menu category changes
  - On their portfolio page, when the user scrolls down, the projects slide like a dice
  - When the user hovers over an image, the image darkens up in a vertical gradient, the text appears, sliding up and the image slowly zooms in.
3. Wanda Print - <http://wandaprint.com/home/>
  - When the user scrolls down, on side of the image slides down and the other slides up, and they meet in the middle, forming the whole image and the text appears
  - On the “our work” page, when the user hovers over an image, the backgrounds turn black and the title, the name of the designer and the link for the project page appears
  - On the project page, the images are in a horizontal carrousel, and when the user clicks right or left, the image, which was very transparent, slides left/right in its full colors
  - When the user hovers over a text, its color changes

### App

- Whatsapp
  - On the “chats” tab, when the user scrolls a conversation left, two options appear, one to archive the conversation and the option “more”. When the user scrolls right, he/she can mark a conversation as unread
  - On the conversation tab, when the user scrolls left a dialogue bubble that she/he sent, another page appears, informing the user when and if the other person read the text and when and if the text was delivered
  - When the user presses a dialogue bubble for a longer time, it darkens up and a menu appears with the options to copy, info, forward and delete
  - When the user takes a screenshot of the conversation tab, the other person receives a notification that the user screenshotted the conversation
  - When the user turns the device to the landscape view, the pages and all its elements, like the keyboard also turn to the side that the user turned to.
