

## **Exercise 13**

### **User Interaction**

**Website 1:**

**Jet Edge**

<http://www.flyjetedge.com/>

When the user scrolls up and down on the homepage, the background images move, the plane on the right scrolls as well, images and text fade, and the text appears as if it is drifting into the page, like a cloud would.

**Website 2:**

**Fixed Group**

<http://www.fixedgroup.com/>

When the user scrolls up and down on the homepage, images and text move up and down into each other, there is a moving background, a menu to the right changes options, and images give off a slight tilt.

**Website 3:**

**Tria**

<http://www.paretria.gr/>

When the user hovers over the text, it fills with color, a moving background appears behind it, there is a slight fade, and the other two words in that line disappear.
