

Project 2, Research

For this project I will make a portfolio website for my own visual, audio and written work. The main goal of the website will be to show off my work to prospective employers and collaborators. Through the work that I include and biography, I hope it will show that I am committed to art and media as a means of social shift.

I will use two websites as inspiration for curation, including that of visual/ digital designer [American Artist](#), because of its horizontal format and simplicity, as well as the website of art collective, [Colectiva Cósmica](#). I like the way this website uses boxes with bold photos that link to other pages in their portfolio section and I hope to do something similar. Right now, all of my radio work, written articles, and art is available on my [Squarespace](#) and I hope to transfer it to the new site.

I want the launch-page of the site to look similarly to American Artist's website, that has a static bottom with a horizontally scrolling top. The site will hopefully be organized by medium so that the navigation bar will lead to different mediums that look like include different pieces in a format similar of Colectiva Cósmica.
